AIM Global Taps Industry Leaders

Trade Association Elects Six Executives to Board of Directors

Warrendale, PA – July 26, 2005 – AIM Global, the trade association recognized as the worldwide authority on automatic identification and mobility, today announced the election of six new members to its 13-member Board of Directors. New Board members are John G. Bruno of Symbol Technologies, Julie England of Texas Instruments, Clive Hohberger of Zebra Technologies, Marcos Honda of ACURA Technologies, Fraser Jennings of Savi Technology, and Michael Lowry of Lowry Computer Products.

As a not-for-profit industry organization, AIM Global's mission is to stimulate the understanding, adoption and use of data collection technology by providing timely, unbiased and commercial-free news and information. Board representatives are elected by the AIM Global membership at large for two-year terms. A 100% growth in the AIM Global membership during 2004 supported an expansion of the Board by four seats to ensure the association leadership reflects the membership issues and objectives.

AIM Global would also like to recognize and thank retiring board members: Mauricio Boaventura of Trix Technologia and Stuart Itkin of Zebra Technologies.

"Automatic identification and data collection technologies continue to revolutionize how business is conducted, from the emergence of wireless mobile computing and RFID (radio frequency identification) to sophisticated bar code systems," said AIM

Global president Dan Mullen. "Data collection technology and mobile computing touches every enterprise, from healthcare to industrial manufacturing and beyond. The impressive slate of industry executives is a testament to the leadership of the companies represented and their willingness to strategically invest the resources required to grow the market for automatic identification and mobility solutions."

Newly elected AIM Global Board Members:

- John G. Bruno, Senior Vice President and General Manager, RFID Division, Symbol Technologies, Inc. (NYSE:SBL)
- Julie England, Vice President, Texas Instruments and General Manager, Texas Instruments RFid Systems
- Clive Hohberger, Vice President, Technology Development, Zebra Technologies
- Marcos Honda, Managing Director, ACURA Technologies
- Fraser Jennings, Vice President, Standards and Regulatory Activities, Savi Technology
- Michael Lowry, President and CEO of Lowry Computer Products

Photos and biographies of Board members are available upon request.

About AIM Global

For more than 30 years, AIM Global has served as the association and worldwide authority on automatic identification, data collection and networking in a mobile environment. AIM members are providers and users of technologies, systems, and services that capture, manage, and integrate accurate data into larger information systems. Serving more than 900 members in 43 countries, AIM is dedicated to accelerating the growth and use of Automatic Identification and Mobility technologies and services around the world.

AIM Global also has an active educational focus, providing accurate and unbiased information on AIDC technology, standards, and applications. For more information on AIM programs, please visit www.aimglobal.org/calendar.

As part of its educational outreach, AIM Global publishes "RFID Connections," the industry's oldest and most respected e-newsletter on RFID. For a free subscription, please visit <http://subscriptions.aimglobal.org>.
