

LOWRY COMPUTER PRODUCTS ANNOUNCES ALIEN TECHNOLOGY® QUALIFICATION FOR RFID LABELS

BRIGHTON, MI – May 27, 2005

Lowry Computer Products, Inc., a leading provider of RFID-EPC, wireless, bar code and data collection solutions, today announced that it has completed Alien Technology's RFID label qualification process for Alien® EPC Class 1 UHF RFID tags. Alien Technology Corporation is a key provider of high-volume, low-cost RFID products for case and pallet tagging.

Lowry's label conversion facility is now a qualified label converter for Alien's EPC Class-1 UHF Squiggle™ and "I" design tags. Alien's Squiggle antenna design provides a low-cost foundation for supply chain labeling solutions. Both Squiggle and I tags are 96-bit high performance solutions that meet a wide range of retail and government based supply chain applications.

"Lowry is very pleased to be an Alien qualified converter," said Mike Lowry, President and CEO of Lowry. "We intend to take full advantage of Alien's market leadership position and provide our customers with a high performance, value-oriented solution," said Lowry. "We are confident that our Alien qualified converter status will enable Lowry to expand our label converting operation as the RFID market rapidly expands."

"As a leading provider of reliable, high-volume, low-cost RFID tags, Alien is delighted to partner with Lowry and leverage their many years of data collection expertise to satisfy the rapidly growing demand for high quality EPC Class 1 labels," said David Bledsoe, Alien Technology Director of OEM and Consumables.

Alien tags are converted into Lowry's Smart Trac™ labels for labeling cases and pallets. Lowry laminates Alien tags with rolls of blank, consecutively numbered or digitally imaged labels using state-of-the-art UHF transponder processing and finishing equipment. The finished Smart Trac labels can be encoded with electronic data and used for RFID-EPC supply chain applications.
