

RFID CERTIFICATION TRAINING SESSIONS OPEN FOR REGISTRATION

Lowry Computer Products Offers Two Upcoming Sessions of RFID Training for Technology Implementers and Technical Professionals Seeking RFID Certification

BRIGHTON, MI – [March 6, 2006] Lowry Computer Products, a leading manufacturer and integrator of wireless, RFID, bar code and data collection solutions, will offer its three-day RFID Training course - *A System's Approach to RFID Implementation™* - in upcoming sessions scheduled for March and April. The training location is Lowry's 5,000+ square foot state-of-the-art RFID Center in Brighton, Michigan. OTA Training, based in Dallas, Texas, is the developer of the comprehensive RFID training curriculum.

Vendor neutral hands-on exercises are conducted throughout the course, and culminate with a half-day set of extensive lab exercises including product tagging exercises on a conveyor belt. Seats are still available for the March 15-17 and April 5-7 training sessions. For registration information, contact Lowry at 800-733-0210 x312 or visit www.lowrycomputer.com/training.
